CHAPTER 1 GENERAL INFORMATION

1.1 Overview

This console is an ideal solution for all network administration environments with multiple servers and platforms. The 17-inch TFT LCD color display and low-profile industrial keyboard/touchpad provide the user-friendliest and most reliable environment for all network administrators. All these functions are integrated into a 17-inch 1u space console. Its rugged construction design also provides space saving and high reliability for all industrial network applications.

The drawer housing the monitor forms a tough and rugged enclosure that will protect it from all hazards and also permits easy access to the monitor controls.

The high quality monitor provides flicker-free color images at the optimal resolutions. It ensures crisp images with clear definitions. This monitor is an auto-adjusting and ergonomically designed display.

We utilize the latest in active thin film transistor (TFT) technology for all our monitors. This provides crisp images and wider viewing angles. Compared with the conventional CRT, the LCD monitors are not affected by the magnetic fields commonly found in most plant floor or communications centers. They are also brighter, making them ideal for high ambient lighting conditions found in today's factory environments. On-screen menus allow for display adjustments. The monitor's P-N-P features support Windows 95/98, NT and XP, with the universal power supply allows global acceptability.

The console's monitor are compatible to most analog RGB (Red, Green, Blue) display standards, including PS/2, optional for Sun Micro System, Apple Macintosh Centris, Quadra and Macintosh II Family signals. The monitor is capable of displaying crisp, vibrant color graphics with VGA, SVGA, XGA (non-interlaced), and most Macintosh compatible color video cards.

SECTION 2 CONTROL PANEL & OSD FUNCTIONS

Controls	Description
Power	Power On/Off Button. LED will be lit when on.
Status	LED indicator for status. Green means power on and signal receipt ; Red means standby, suspend or power off.
Exit	Auto-sync and scale down display to default factory settings
Δ	Move cursor up to the function to be adjusted
▽	Move cursor down to the function to be adjusted
Menu	To access the main menu and also double as the 'Enter' button
Auto	Auto-adjustment

2.1 Color (To adjust the factors such as contrast, brightness, gamma, colour temp and color adjust)

2.1.1 Contrast

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Color'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Contrast'
- VII. Press the 'Menu' button to confirm the selection and the number of scale on the right will turn red from black.
- VIII. Use the 'UP' & 'Down' buttons to change the number for contrast adjustment.

2.1.2 Brightness

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Color'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Brightness'
- VII. Press the 'Menu' button to confirm the selection and the number of scale on the right will turn red from black.
- VIII. Use the 'UP' & 'Down' buttons to change the number for Brightness adjustment.

2.1.3 Gamma

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Color'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Gamma'
- VII. Press the 'Menu' button to confirm the selection and the numbers from 0 to 3 on the right are selectable.
- VIII. Use the 'UP' & 'Down' buttons to scroll down to the wanted number(selection) and press 'Menu' button to confirm for Gamma adjustment.

2.1.4 Color Temperature

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Color'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Color Temp'
- VII. Press the 'Menu' button to confirm the selection and There are 4 options on the right, (9300, 6500, 5800 and User) .
- VIII. Use the 'UP' & 'Down' buttons to scroll down to the wanted selection and press 'Menu' button to confirm for Color Temperature adjustment.

2.1.5 Color adjustment

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Color'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Color Adjust'
- VII. Press the 'Menu' button to confirm the selection and the OSD will switch to another display mode with 4 options on the right(Red, Green, Blue colors with scale and Exit.) .
- VIII. Use the 'UP' & 'Down' buttons to scroll down to the wanted color and press the 'Menu' button to confirm the selection and the number of scale on the right will turn red from black.
- VIII. Use the 'UP' & 'Down' buttons to change the number for Color adjustment.
- IX. To leave this selection (Color Adjust), use the 'UP' & 'Down' buttons to scroll up or down to 'Exit'

2.1.6 Exit from “ Color” selection

- I. To leave this selection, use the 'UP' & 'Down' buttons to scroll up or down to 'Exit'
- II. Press the 'Menu' button to confirm the selection and move back to the options on the left.

2.2 Picture (To adjust the factors such as Horizontal position, Vertical position, clock and sharpness)

2.2.1 Horizontal position

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Picture'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'H.Position'
- VII. Press the 'Menu' button to confirm the selection and the number of scale on the right will turn red from black.
- VIII. Use the 'UP' & 'Down' buttons to change the number for Horizontal position adjustment.

2.2.2 Vertical position

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Picture'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'V.Position'
- VII. Press the 'Menu' button to confirm the selection and the number of scale on the right will turn red from black.
- VIII. Use the 'UP' & 'Down' buttons to change the number for Vertical position adjustment.

2.2.3 Phase

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Picture'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Phase'
- VII. Press the 'Menu' button to confirm the selection and the number of scale on the right will turn red from black.
- VIII. Use the 'UP' & 'Down' buttons to change the number for Phase adjustment.

2.2.4 Clock

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Picture'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Clock'
- VII. Press the 'Menu' button to confirm the selection and the number of scale on the right will turn red from black.
- VIII. Use the 'UP' & 'Down' buttons to change the number for Clock adjustment.

2.2.5 Sharpness

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Picture'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Sharpness'
- VII. Press the 'Menu' button to confirm the selection and the numbers from 1 to 5 on the right are selectable.
- VIII. Use the 'UP' & 'Down' buttons to scroll down to the wanted number(selection) and press 'Menu' button to confirm for Sharpness adjustment.

2.2.6 Exit from “Picture” selection

- I. To leave this selection, use the 'UP' & 'Down' buttons to scroll up or down to 'Exit'
- II. Press the 'Menu' button to confirm the selection and move back to the options on the left.

2.3 Function (To adjust the factors like Auto colour & Auto adjustment)

2.3.1 Auto Color

- I. Press the 'Menu' button to activate the on-screen menu
- II. Use the 'UP' & 'Down' buttons to scroll up or down
- III. Scroll down to the selection 'Function'
- IV. Press the 'Menu' button to confirm the selection.
- V. Use the 'UP' & 'Down' buttons to scroll up or down
- VI. Scroll down to the selection 'Auto Color'
- VII. Press the 'Menu' button to confirm the selection and There are 2 options on the right (YES and NO).

SECTION 4 INSTALLATION

4.1 Preparation for installing the Console into the Cabinet

- I. Make sure that all the accessories are present according to the list.
- II. Make sure that the main console unit is not damaged.
- III. Make sure that equipment is powered off.
- IV. For standard rack-mounts, the shorter brackets are required.

4.2 Hardware Kit Content

- I. Short back rail for 520mm ~ 800mm mounting range

- II. Long back rail for 800mm~1100mm mounting range

- III. Philips screws x 8 (For mounting rail to Console unit)

- IV. Bolt x 8

4.3 Installation for the Console equipped into the Cabinet

I. Well prepare the below items and accessories. (see below pictures)

Short back rail for 520mm ~ 800mm mounting range

Philips screws

Bolt

Long back rail for 800mm~1100mm mounting range

II. Measure the length of A . See figure 1.

III. If the length of $A + 3.5\text{mm}$ is between $500\text{mm} \sim 800\text{mm}$, then get the short support ear. If the length of $A + 3.5\text{mm}$ is over 800mm , please use the long support rear for Installation.

IV. Screw the back rail which would be fixed with LCD console unit to the proper Position of the rackrail of the cabinet. See figure 2

- V. Install the LCD console by inserting the guide of the unit(both side of LCD console unit) into the 2 back rails. And push the console to the end of back and screw the front rail to the proper position of the rackrail of the cabinet. See Figure 3

Figure 3

VI. Finish installation by connecting cables and switching power. See figure 4.

Figure 4
